

076815 Triumph Tiger 1050 Sport Hugger Fitting Instructions

- Remove the OEM Hugger from the bike. Be sure to replace the inner rear bolt as this will protect the thread. This mounting point is not used in the fitment of this Hugger.
- Fit the two brackets as shown in the image. Use the M5 X 12mm bolts with the M5 steel washers. Do not fully tighten until all parts are in place.
- Slide the Hugger into position over the brackets and fix using the M6 X 16mm bolts, M6 steel washers and plastic washers. The other plastic washers are used with the other two OEM mounting points and OEM bolts.
- Adjust the Hugger if necessary and tighten all the fixing points.
- **Be sure to check all fixing points periodically.**
